

SKILLS

Languages: C# · JavaScript · TypeScript · Python · SQL
Backend: .NET · Node.js · FastAPI
Frontend: React · Angular
Databases: PostgreSQL · MongoDB · Supabase · MySQL
Cloud & DevOps: Docker · AWS · Azure

PROFESSIONAL EXPERIENCE

Freelance Backend Developer | Remote Sept 2025 – Present

- Delivered a legal MVP end-to-end, collaborating with stakeholders to define requirements and ship features in an agile setup.
- Designed and built a C#/.NET monolithic backend, implementing secure REST APIs and documenting business and security flows.
- Improved Angular frontend integration, ensuring API reliability and architectural consistency.

Tech: C#/.NET, Angular, REST APIs, Git

Backend Developer | PetCare Manager Jul 2025 – Sept 2025

- Migrated databases from SQLite to PostgreSQL/MySQL (cloud) with zero data loss and improved scalability.
- Refactored backend to remove local dependencies, stabilising cloud deployments and frontend integration.
- Built secure import/export pipelines and API endpoints, validated with functional and integration tests.

Tech: Python, PostgreSQL, MySQL, Docker, Render, PythonAnywhere

Backend Developer | Atisa Mar 2025 – Jun 2025

- Built backend and database for an AI chatbot, implementing RAG with OpenAI and vector databases, cutting model testing time by 30%.
- Automated legal bulletin ingestion via scraping and public APIs, reducing processing time from 2h to 10min across 70+ regions.
- Analysed and documented a PHP/CodeIgniter employee portal architecture to support future improvements and data visualisation.
- Implemented low-code automation with n8n and REST APIs, significantly reducing manual operational tasks.

Tech: Python, FastAPI, Flask, Docker, OpenAI API, Chroma, n8n, PHP, CodeIgniter, MySQL

PROJECTS

- **Legal Firm Management System:** Automates repetitive tasks, deadline tracking, and invoicing, enhancing efficiency while ensuring GDPR/LOPDGDD compliance. Reduced daily management time by 30%. **Technologies:** .NET + PostgreSQL, monolithic architecture, Angular.
- **AI-Powered Document Assistant:** Transforms corporate documents into accessible knowledge via conversational AI, featuring vector search, real-time streaming, and separate dashboards for users and administrators. Boosts productivity in document review and internal support. **Technologies:** Python, LangChain, GEMINI API, Flutter Web.
- **REST API for Event Management and Ticket Sales:** Complete real-time inventory management, WebSocket notifications, and concurrent transaction handling, ensuring security and scalability. Supports peaks of up to 5,000 concurrent users without failures. **Technologies:** Node.js + MongoDB + Redis.

EDUCATION

Tajamar (Oct 2025 – Jun 2026, expected)

Master's in Full Stack & Cloud Development (C#, .NET Core, React, Angular, Azure/AWS, DevOps)

IES Vista Alegre (Sep 2023 – Jun 2025)

Higher Technician in Multi-Platform Application Development (Java, Python, SQL/MySQL, Android, Git, OOP,VB.NET)

CERTIFICATIONS

- [AWS Certified Solutions Architect – Associate — The Experis Academy](#)
- [Web Development with Python — Tajamar](#)

LANGUAGES

Spanish (C2) French (B2)
